

**CITY COUNCIL  
MINUTES OF SPECIAL CALLED MEETING  
JANUARY 30, 1997  
7:00 p.m.**

The City Council of Peachtree City met in a special called session on Thursday, January 30, 1997, at 7:00 p.m. in the City Hall Council Chambers.

Mayor Lenox led those attending in the pledge of allegiance. Council members present were: Annie McMenamin, Bob Brooks, Jim Pace and Caroline Price.

Mayor Lenox explained the purpose of the meeting that night was to discuss the proposed acquisition of Georgia Utilities Corporation, the private company that owns and operates the sewerage system in Peachtree City. He said it was important for everyone to understand up front that it was the Water and Sewerage Authority that could legally acquire system, not the City Council. He explained the Water and Sewerage Authority was established back in 1987 when the State Legislature passed enabling legislation. He said the Authority was created for the sole purpose of acquiring Georgia Utilities and that City Council could only recommend that the Authority buy the system.

He said the question before Council that night was whether or not to recommend to the Water and Sewerage Authority that it purchase the system. He introduced the following members of the Water and Sewerage Authority: John Gronner - Chairman, Jim Cole, Ray Helton, Ted Taylor, and John Williams.

Lenox explained there would be a comprehensive presentation of all aspects of the proposed acquisition of Georgia Utilities. He said he would begin the presentation with some comments on "Why" the system should be acquired, a history of rates, and would conclude with an explanation of "Rate Control Versus Acquisition."

Lenox said the valuation consultant, Mr. Gerald Chancellor, of Hartman and Associates, would then give a detailed presentation on the lengthy process involved in arriving at their value of the system. Following Mr. Chancellor's presentation, he said he would take a few minutes to comment on "Condemnation of the System Versus Acquisition," followed by addressing the real issues that night: Just how much is the system going to cost? What are the major line item expenses? and, What are the key conditions of the purchase?

Concluding the presentations, Mr. Todd Barnes of A.G. Edwards & Sons, the Investment Banker, would then discuss the bond issue that would finance the purchase of the system.

Lenox said following all the presentations that night, the meeting would be open for public comments and questions. He also explained there would be a second opportunity for citizens to ask questions at next Monday night's 7:00 p.m. meeting of the Water and Sewerage Authority. He said at that meeting the Authority would actually vote on acquiring the system.

For the purpose of these minutes an outline of the presentation is provided below:

## **WHY ACQUIRE THE SYSTEM?**

- ▶ System will be operated in the public's interest
- ▶ Service will be available to all on a fair and equitable basis
- ▶ System will be properly constructed and maintained
- ▶ System will be operated in an environmentally friendly and safe manner
- ▶ System management will be responsive and responsible to customers and the Authority
- ▶ System will be managed by an experienced professional in sewerage system operation and not by a developer
- ▶ System rates will be held to the absolute lowest level possible
- ▶ System value and purchase price will only increase over time
- ▶ System has adequate cash flow to fund acquisition costs and to service the bond issue debt

## **GEORGIA UTILITIES ACQUISITION HISTORY**

- ▶ 1983 - GU Rate Increased to \$12.00 per month
- ▶ 1986 - GU Rate Increased to \$14.00 per month
- ▶ 1987 - Water and Sewerage Authority created to acquire and operate the sewerage system
- ▶ 1989 - GU Rate Increased to \$17.00 per month
- ▶ 1990 - GU Rate Increased to \$18.50 per month
- ▶ 1991 - GU Rate Increased to Metered Rate - \$2.45/1,000 gallons
- ▶ 1992 - GU Rate Increased to \$3.50/1,000 gallons first 10,000; \$1.75 each additional 1,000 gallons
- ▶ 1993 - (August) Confidentiality Agreement with Equitable & PCDC
- ▶ 1994 - (December) PCDC purchased Equitable's remaining interests in PTC; talks halted for 6 months
- ▶ 1995 - (June) Indication that PCDC might want to resume talks
- ▶ 1996 - (March) Negotiation Team appointed - Mayor Lenox, John Gronner, Jim Basinger, Jim Webb
  - (March) Steering Committee appointed - Mayor Lenox, John Williams, Jim Basinger, Steve Rapson
  - (April) Consultants approved to begin system valuation
  - (May) Additional Confidentiality Agreement with PCDC
  - (August) Serious negotiations initiated

## **RATE CONTROL VIA LEGISLATION**

- ▶ Passage of state legislation to control rates is remotely possible
- ▶ Premise that rates can be controlled is flawed

- ▶ Public Services Commission approves all rate increases that are justified
- ▶ GUC System is not "state of the art" - Required improvements may justify increase
- ▶ City/Authority can operate and make improvements at less costs than GUC:
  - I. No income or property taxes
  - II. No franchise fee
  - III. Lower interest rate
  - IV. Do not make a profit
- ▶ Authority is in a better position to hold down future rate increases

**HARTMAN AND ASSOCIATES, INC. - WATER AND WASTEWATER  
SYSTEM VALUATION EXPERIENCE 1976 - 1996**

|                                |     |
|--------------------------------|-----|
| ▶ Representing Buyer           | 58  |
| ▶ Representing Seller          | 54  |
| ▶ Representing Investors       | 50  |
| ▶ Representing Public Entities | 62  |
| ▶ Transactions Closed          | 70  |
| ▶ Transactions Not Closed      | 32  |
| ▶ Pending                      | 10  |
| TOTAL ACQUISITIONS:            | 112 |

**HARTMAN AND ASSOCIATES, INC - PERSONNEL**

- ▶ **PROFESSIONAL ENGINEERS & ENGINEERS:**  
Gerald C. Hartman, P.E.  
Gerald L. Chancellor, P.E.  
Andrew T. Woodcock, P.E.  
Richard J. Voorhees, P.E..  
Matthew B. Alvarez, E.I.  
Bobby W. Wyatt, E.I.  
Bradford K. Labella, E.I.  
Dwayne R. Kreidler, E.I.
  
- ▶ **HYDRO GEOLOGISTS:**  
Charles W. Drake, P.G.  
James E. Golden, P.G.  
Dale L. Claytor

- Neil C. Klaproth
- ▶ **SURVEYORS:**
  - Mark I. Luke, P.S.M.
  - David C. Ragland
  - Russell D. Teeters
  - Shannon D. Clatchey
  - Lawrence E. Jenkins, P.S.M.
  - Lino T. Sanft
  - Luke Bennett
  - Christopher W. Hardin, E.I.
- ▶ **FINANCIAL ANALYSTS:**
  - Marco H. Rocca, C.M.C.
  - Richard C. Copeland, M.B.A.
  - Mounir M. Elkaldi, M.B.A., C.P.A.
  - Daryll B. Parker, M.B.A.
  - Anthony P. Reddeck, E.I.

### **HARTMAN AND ASSOCIATES, INC. - VALUATION TRACK RECORD**

- ▶ Condemnation experts in South Carolina, Florida and Mississippi
- ▶ Court binding arbitration experts
- ▶ Numerous court cases
- ▶ Over \$2 billion in water and wastewater utility financing in the past seven years (bond issues).
- ▶ National AWWA or Joint AWWA/WEF valuation papers in the last three years.

### **WASTEWATER SYSTEM**

- ▶ Sewer pipe (in miles):
  - Collection (4-42 inches) 142
  - Force mains (2-12 inches) 7
- ▶ Manholes: 3,056
- ▶ Pump Stations: 26
- ▶ Major Real Properties Owned 349 acres
- ▶ Wastewater Treatment Plants:
  - Flat creek 0.9 mgd
  - Rockaway 2.0 mgd
  - Line Creek 2.0 mgd

### **FLAT CREEK WWTP**

- ▶ Capacity: 0.9 Mgd
- ▶ Treatment: Extended Aeration  
Clarification  
Filtration  
Chlorination  
Aerobic Sludge Digestion  
Sludge Dewatering
- ▶ Effluent Disposal Outfall to Flat Creek

### **ROCKAWAY WWTP**

- ▶ Capacity: 2.0 Mgd
- ▶ Treatment: Sequential Batch Reactor  
Chlorination  
Aerobic Sludge Digestion  
Sludge Dewatering
- ▶ Effluent Disposal Outfall to Line Creek

### **LINE CREEK WWTP**

- ▶ Capacity: 2.0 Mgd
- ▶ Treatment: Extended Aeration Clarification  
Chlorination  
Aerobic Sludge Digestion  
Sludge Dewatering
- ▶ Effluent Disposal Outfall to Line Creek

### **PEACHTREE CITY WASTEWATER PROJECTIONS**

| Year                     | Historical |        |        |        | Projected |        |        |
|--------------------------|------------|--------|--------|--------|-----------|--------|--------|
|                          | 9/94       | 9/95   | 9/96   | 9/97   | 9/98      | 9/99   | 9/00   |
| Population               | 25,072     | 27,299 | 28,772 | 30,520 | 32,268    | 34,016 | 35,764 |
| Wastewater Flow<br>(MGD) | 2.33       | 2.44   | 2.65   | 2.79   | 2.95      | 3.11   | 3.27   |
| Wastewater<br>(gpd/cap)  | 92.9       | 89.4   | 92.1   | 91.5   | 91.5      | 91.5   | 91.5   |

## **CAPACITY EVALUATION**

- ▶ Projected Year 2000 Buildout Wastewater Flow  
3.27 Mgd (Annual Average)  
4.25 Mgd (Maximum Monthly Average)
- ▶ Total Wastewater Treatment Capacity  
4.90 Mgd
- ▶ Population Served at 4.90 Mgd  
50,000 Persons
- ▶ Present Population Served  
30,000 Persons

## **HARTMAN AND ASSOCIATES - DUE DILIGENCE EFFORTS**

- ▶ Facility Inspections
  - Review of All 26 System Lift Stations
  - Inspection of All Three Wastewater Treatment Plants
  - Survey/verification of over 110 Miles of Collection System
  - Inflow/infiltration Field Study (Monitoring)
- ▶ Engineering Analysis of WWTP's
- ▶ Inflow/infiltration Study Computer Analysis
- ▶ Review of Regulatory Compliance Data
- ▶ Interviews with On-site Personnel
- ▶ Review and System Take-off of All Available Engineering Drawings
- ▶ Alternative Analysis of System Operation and Configuration
- ▶ Environmental Audits of All WWTP Sites and Sludge Disposal Site
- ▶ Operations & Maintenance Review
- ▶ Identification of Repairs and Upgrades
- ▶ Existing Budget Analysis
- ▶ Financial Analysis of Revenues and Expenses
- ▶ Audit, Balance Sheets and Debt Analyses
- ▶ Customer Statistical Analyses
- ▶ Customer Growth Projections
- ▶ Developer Agreement Review
- ▶ Contracts Analysis

## **CONDITION OF FACILITIES**

|                    |                 |
|--------------------|-----------------|
| Collection System: | Fair to Good    |
| Lift Stations:     | Poor to Good    |
| Flat Creek WWTP:   | Poor            |
| Rockaway WWTP:     | Average to Good |
| Line Creek WWTP:   | Average to Good |

## **IDENTIFIED DEFICIENCIES AND DEFERRED MAINTENANCE**

- ▶ **Manholes:**
  - Repair of Damaged Covers and Rims
  - Cleaning to Remove Buildup of Material
  - Inflow/infiltration Repairs
  - Removal of Asphalt over Manholes Due to DOT Resurfacing
- ▶ **Gravity System:**
  - Further Study and Repair of Inflow/infiltration
  - Replacement of System Flow Splitter Box
- ▶ **Lift Stations:**
  - No Auxiliary Power Connection
  - No Audible or Visual Alarms on Some Lift Stations
  - No Water Service
  - Repairs to Bring All Lift Stations to Operational Duty
- ▶ **Flat Creek WWTP:**
  - Auxiliary Generator Required
  - One Clarifier Drive for Two Mechanisms
  - Exposed Pvc Piping
  - Lack of Adequate Handrails
  - Inoperable Filtration Units
  - Replace Clarifier
  - Refurbish Various Metal Components
- ▶ **Rockaway WWTP:**
  - Additional SBR Basins Required
  - Additional Blower Required

- New Post Aeration Facilities Required
- Auxiliary Generator Required

▶ **Line Creek WWTP:**

- Additional 40 Foot Clarifier Required
- Additional RAS/WAS/was Pumps Required
- Additional Chlorination Capacity Required
- Upgrade Surface Aerators
- New Post Aeration Facilities Required
- Auxiliary Power Required

**CAPITAL IMPROVEMENTS**

- ▶ Improvements to sludge stabilization facilities at all three WWTPS regarding land application of domestic wastewater sludge.
- ▶ Dechlorination facilities at all three WWTPS to comply with anticipated effluent chlorine residual limitations.
- ▶ Copper pretreatment facilities at the Flat Creek WWTP to meet the proposed EPD effluent copper limitations as contained in the recently revised NPDES permit.
- ▶ Anticipated system planning and operational documents including O&M manuals, system master plan, rates and charges study, sewer system evaluation study (SSES) and similar work activities.
- ▶ General upgrades at all three WWTPS including the protective lining of concrete process basins, storm water control facilities and installation of handrails and walkways at Flat Creek and Rockaway.
- ▶ The Flat Creek WWTP improvements.
- ▶ Replacement of the Line Creek pretreatment equipment.

|                     |                        |                     |
|---------------------|------------------------|---------------------|
| <b><u>VALUE</u></b> | Opinion of Value       | \$17,600,000        |
|                     | 1996 Capital Additions | <u>\$ 350,000</u>   |
|                     | <b>Total</b>           | <b>\$17,950,000</b> |

**Basis of Opinion:**

- ▶ Professional Experience
- ▶ Study of this System
- ▶ Evaluation of the Market
- ▶ Application of Three (3) /Standard Valuation Methods
- ▶ Verification, Analysis and Comparison Activities

**Opinion of Value Based On:**

- ▶ Inspections, Testing and Operations
- ▶ Discussions with Regulatory Agencies
- ▶ Discussions with Operational Staff
- ▶ Review of Available Documents
- ▶ Industry Standards
- ▶ Analysis of Standard Valuation Methods

**VALUATION METHODS**

- ▶ Reproduction Cost
- ▶ Income Analysis
- ▶ Comparable Sales
  - All Provide Different Insights to Valuation Expert
  - Each Method Has Advantages and Disadvantages

**1. REPRODUCTION COST METHOD**

- ▶ The Cost of Reproducing the Entire Utility System at One Time in the Most Cost Effective Method
- ▶ Less Depreciation: Physical, Functional, External
- ▶ Less: Deficiencies, Liabilities
- ▶ Plus: Land and Easements, Fixtures, Equipment and Rolling Stock, Construction Work in Progress, Goodwill and Going Concern

**Advantages of the Cost Method**

- ▶ Values All Property
- ▶ Requires Disclosure of Inventory
- ▶ Actual Condition of Assets Is Considered
- ▶ Considers How Assets Are Designed and Constructed, and How They Function

**Disadvantages of the Cost Method**

- ▶ Does Not Address Financial Health
- ▶ Does Not Address What the Market Would Pay
- ▶ Assumes That the Buyer Will Pay 100% for All Assets, Even Though in the Real World,

**Certain Assets Are Contributed**

- ▶ Assumes No Discount for Unused Assets
- ▶ Speculative with Regard to Underground Facilities
- ▶ Does Address the Following Costs:
  - Capacity Needs for Existing Customers
  - Renewal and Replacement Needs
  - Known Line Relocation Requirements
  - Present Future Regulatory Requirements
- ▶ Does Not Address Operational Problems

**Reproduction Cost of Assets less Depreciation**

|                                 |                     |
|---------------------------------|---------------------|
| Wastewater Services             | \$ 1,615,343        |
| Gravity Collection System       | \$20,437,100        |
| Lift Stations                   | \$ 919,032          |
| Wastewater Transmission Mains   | \$ 613,887          |
| Wastewater Treatment Facilities | <u>\$ 5,243,208</u> |
| Total                           | \$28,828,570        |

|                                                        |                    |
|--------------------------------------------------------|--------------------|
| <b>Land and Easements Amount:</b>                      | <b>\$2,277,000</b> |
| <b>Fixtures, Equipment Inventory and Rolling Stock</b> | <b>\$ 265,000</b>  |

▶ **Wastewater Facilities Deficiency Summary:**

| <b>ITEM</b>                                    | <b>ESTIMATE</b>   |
|------------------------------------------------|-------------------|
| Wastewater Collection Facilities/Lift Stations | \$ 145,400        |
| Estimated I/I Repair                           | \$1,226,000       |
| Flat Creek WWTP                                | \$ 200,000        |
| Rockaway WWTP                                  | \$1,594,000       |
| Line Creek WWTP                                | <u>\$ 976,000</u> |
| Total                                          | \$4,141,4000      |

Note: \$350,000 of Deficiencies Are Presently or Have Been Corrected (Original Total Was \$4,491,400).

|                                      |             |
|--------------------------------------|-------------|
| Construction Work in Progress Amount | \$1,508,240 |
| Goodwill and Going Concern           | \$1,419,371 |

### **Reproduction Cost Approach Summary**

|                                         |                  |
|-----------------------------------------|------------------|
| Reproduction Cost New less Depreciation | \$28,828,570     |
| Land                                    | 2,277,000        |
| Fixtures, Equipment, Rolling Stock      | 265,000          |
| Deficiencies & Deferred Maintenance     | (4,141,400)      |
| CWIP                                    | <u>1,508,240</u> |
| Subtotal                                | \$ 28,737,410    |
| 5% Goodwill and Going Concern           | <u>1,419,371</u> |
| Total                                   | \$ 30,156,781    |

2. **COMPARABLE SALES METHOD:** The Comparable Sales Method Considers the Multitude of Wastewater Utility Purchases and Sales. This Method Reflects What Others Pay for Similar Properties. The Sales Include All Factors Considered by a Knowledgeable Buyer and Seller.

### **Advantages of the Comparable Sales Method**

- What a Willing Buyer Will Pay and What a Willing Seller Will Accept
- Considers Contributions
- Considers Cost of the Assets
- Considers the Income Stream
- Considers the Liabilities
- Considers Regulations and Risk of Change
- Considers the Cost of Money
- Considers What the Market Was Thinking at the Time

### **Disadvantages of the Comparable Sales Method**

- Requires Comprehensive Knowledge of Wastewater Business
- No Two Utilities Are Identical, Therefore Requires Expert Judgment and Common Sense
- Requires Enormous Effort to Compile and Analyze Sales Data
- Requires an Understanding of Hundreds of Complex Wastewater Systems
- Requires an Understanding of the Wastewater Market

### **Screening Comparable Sales**

- Sales Occurring in Southeastern US
- Must Have Wastewater Treatment
- Wastewater Treatment Capacity Between 1.0 Mgd and 12.0 Mg
- Total Wastewater ERC's Between 1,700 and 15,000
- Sales Occurring from 1990 to Present
- Purchase Price over \$5,500,000
- Hartman's Experience

### **Summary of Analysis**

- ▶ Number of Comparable Sales on Record at Hartman & Associates - in Excess of 600
- ▶ Number of Sales in Preliminary Evaluation Set - Approximately 45
- ▶ Number of Sales in Final Evaluation Set - 13
- ▶ Range of Most Comparable Sales Indicated Values - (\$11,699,367 - \$16,228,953)
- ▶ Range of Analysis Indicated Values - (\$9,729,052 - \$28,830,090)

Note: All of the above Are Adjusted to like Transactions.

**Comparable Sales Indicated Value**                      \$17,069,400

3. **INCOME METHOD** - The Present Value of the Income Stream less the Present Value of Capital Needs.

#### **Advantages of Income Method**

- ▶ Values the Income Stream
- ▶ Considers the Business Risk

#### **Disadvantages of Income Method**

- ▶ Requires Assumptions about the Unknown
- ▶ Requires the Projection of Uncertain Income into the Future
- ▶ Requires the Projection of Uncertain Expenses into the Future
- ▶ Requires Assumptions about Things That Will Change
- ▶ Requires Assumptions about the Adequacy of Present Facilities

**Income Approach Results**                \$17,900,253

**Results of the Methods**

|                     |              |
|---------------------|--------------|
| ▶ Reproduction Cost | \$30,156,781 |
| ▶ Income            | \$17,900,253 |
| ▶ Comparable Sales  | \$17,069,400 |

|                         |                   |
|-------------------------|-------------------|
| <b>Opinion of Value</b> | \$17,600,000      |
| 1996 Capital Additions  | <u>\$ 350,000</u> |
| Total                   | \$17,950,000      |

**ACQUISITION VERSUS CONDEMNATION**

**Upside**

- ▶ No Gamble with a Jury Award
- ▶ Extensive Due Diligence to Know What We Are Buying - Inspection of All Records, Equipment and Facilities
- ▶ Indemnification - Protection Against Certain System Deficiencies/problems via Condition in the Sale Agreement
- ▶ Planned Transfer of Ownership as a Going Business
- ▶ Save \$800,000 - \$1,000,000 in Condemnation Legal and Consultant Fees

**Downside**

- ▶ A Jury May Award a Lower Price for the System in Condemnation Action
- ▶ Must Assume All Liability
- ▶ Must Negotiate Any Pending Lawsuits
- ▶ Risk and Expense of Dissolving Georgia Utilities Corporation

**GEORGIA UTILITIES ACQUISITION COMPARISON- ANALYSIS STOCK  
V.S. CONDEMNATION**

| <b><u>Type of Transaction</u></b> | <b><u>Condemnation<br/>Their Expert</u></b> | <b><u>Condemnation<br/>Out Expert</u></b> | <b><u>Condemnation<br/>Most Likely</u></b> |
|-----------------------------------|---------------------------------------------|-------------------------------------------|--------------------------------------------|
| Purchase Price                    | \$32,000,000                                | \$17,600,000                              | \$ 23,000,000                              |
| FY 96 Capital Improvements        | \$ 350,000                                  | \$ 350,000                                | \$ 350,000                                 |
| Debt Assumed                      | -                                           | -                                         | -                                          |
| <b>Subtotal (Purchase Price)</b>  | <b>\$32,350,000</b>                         | <b>\$17,950,000</b>                       | <b>\$ 23,350,000</b>                       |

Notes: (1) This Analysis Takes the Actual Results and Adjusts Them to Show What the Net Income Would Have Been Had the System Been Owned and Operated by the Authority. In So Doing, Expenses Such as Property Taxes, Franchise Fees and Management Fees Have Been Deducted from the Operating Expenses and Capital Recovery Fees Have Been Deducted from Revenues.

(2) Net of Depreciation and Amortization.

Through out the presentation citizens were allowed to ask questions and make comments. Following the presentation, Council had a brief discussion. Lenox made a motion to recommend that the Water and Sewerage Authority acquire Georgia Utilities Corp. through the issuance of revenue bonds. Price seconded the motion. Motion carried unanimously.

Lenox made a motion that Council should extended the city's full faith and credit to the bonds and in return the Council would require that the Water and Sewerage Authority obtain Council approval to 1) extend the system outside the corporate limits of the city, 2) obtain council approval of the

Capital Improvement Program/Budget for each of the initial three years of ownership, and 3) that Council review the annual operating budget each year. Pace seconded the motion. Motion carried unanimously.

Brooks made a motion to delete the ordinance requiring the four percent sewerage service gross receipts tax and recommended that the Water and Sewerage Authority pass this four percent savings on to the customers. McMenamin seconded the motion. Motion carried unanimously.

Lenox made a motion to adjourn the meeting. Pace seconded the motion. Motion carried unanimously.

  
Nancy Faulkner, City Clerk

Attest:   
Robert L. Lenox, Mayor
